to keep them sweet and cleun

these fears frether.

Those who have used Dr. Pierce's Favorite Prescription do not suffer from the change of life either in face, form or feelings as do other women. This fact is due to the introduced by the consection of the c may people think that they can set W Va. to work. them just where the nest chances to be, or if they do decide to move at this place Soughy. them, they hold them up by the legs and carry them to the new austic.

Good results cannot be had if the hens are set in the hen house where other hens can fight with them and Richards n. lay in the same nest. They will breig! Mins Lydia Summons, of Walkeidethe aggs, and often the hen is drive attended church here Sunday en from the nest and the eggs get chilled so that none will hatch.

As soon as the hen has shown that she is broody, prepare a nest le sish of a room or loft, where nothing can distarb her, and after dark take er gently under your arm and gently place her on it. Arrange the box so that the front may be closed up, thus confining her for at fens; one it must be roomy. Susp boxes are jus right Cut out a small opening in front down to six inches from bottom so that she can step in without hav ing to jump on the eggs. Make the next of crean straw or hay, broken self and presed closely down lat the curtiers and rounded just a little

50 that eggs will not roll out. On the second day place corn, grit nd water in front of nest, take down the board and gently lift her off and let her eut and drink.

Have the eggs ready and place then in the nest, not too many during the carry months, and then leave the room. After she has satisfied her tunger, she will return to the next. Should she refuse to return, it is

est not to waste any further time as there will be danger of her not being faithful, and the eggs will be lost bull, those that refuse to return after the eggs are placed in the iest are very few

By this arrangement a row of nests with setting bens may be placed all around the walls of a room, and alf that need be done is to keep food. water, grit and a box of dust setting

in the middle of the room. If two hens are set at the sain time both broads may be given to one hen, and the other one left to

When the heas are first set, they and again two weeks afterward, then of orators. again when the chicks are hatched. In not grase the bens or chicks.essecially during cold weather, as he is desired, since the acid sets free grease destroys the down on the little fenows and they get chilled.

For the first few days feed the chicks roiled outs or stale crackers. moistened with milk or water, and after that change to other grains.

EGGS FOR HATCHING.

The greatest care should be exerdised in selecting the eggs for hatch- the greatest pulpit orator our couning cherries, 20 feet apart each way ing. There is nothing more discourtry has produced. aging than to waste one's time for three weeks, and then have only a leading Presbyterian dergyman of the design and few weak chicks hatched out.

By selecting the eggs from heas kept in separate pensistrong, healthy, eradite Hebrew scholar of all Amer- tape control in a next restrates the hustling hens, not over fat, we may be ion.

Select eggs of uniform size, with history.

wer a few days old the strongest and best chicks, and slander and libel. we should prefer to always keep over "Kentucky contributed Linvoln mough of the best old bens to by the North and pave Davis " "

WANTS A NEW APPLE

The Indiana Horticultural Society than the other. aggests a prize of \$1,600 for a new pple "as good as Grimes Golden who furnishes such apple will earn faces, they have been so the Bank

There are thousands of acres hillside land that are not utilized yet a hillside is an excellent location for an orohard. Some of the best crubfertilizer to use for different arts are on and that cannot be ployed. Where had can be tilled it is an advantage, box hillside hand will not only permit of fruit-growing, but level ground Wherever a portion tion it can be given up to sheep.

It is the fat (cream) in the and fat is the element lacking with that causes an increase in cos for fool, but the solids. The R. .. There is no int food that is the skimmed milk. The difference be tween the solids and the fat, so far as accust value is concerned, is but little, as the skimmed milk can be miliaed on the farm to advantage. Fat in milk eners less in proportion to I's Out market price than any other article
